

Design & Technology

■ Remarkable Curriculum ■

Ambition

- Design and Technology is an inspiring, rigorous, and practical subject.
- We provide our students with a curriculum that focuses on solving real world problems and the design and creation of high-quality products.
- Students work in range of systems, media, materials, and processes.
- We are ambitious with the range of systems, media, material and processes students learn.

Commitment

- We are committed to provide students with appropriate scaffolded pathways to meet their needs.
- We are committed to ensure knowledge, techniques, critical studies, and skills are taught and revisited to allow students to develop great confidence, independence, and mastery.
- We have a commitment to provide students with opportunities to widen their actual experience.

Pride

- We support students to take risks, be resourceful and innovative.
- We provide opportunities to explore different learning styles through theory and practical lessons.
- We take pride in developing confidence to tackle challenging concepts, thinking innovatively, and developing creativity.
- We take pride in working safely, demonstrating, and understanding health and safety principles
