

Health & Social Care

■ Remarkable Curriculum ■

Ambition

- We provide an ambitious curriculum across two key stages in Health and Social care which embeds the key knowledge needed to achieve.
- We are ambitious in developing the understanding that working in health or social care is a rewarding career to have and that there are many different pathways these courses can lead to.
- We are ambitious in building critical thinking skills which are needed in working when this sector.
- We are ambitious in developing their professional values in our students.

Commitment

- We are committed to developing a student body who can recognise differences and explain responses to the differing needs of individuals within health and social care settings.
- We are committed to building an understanding of the subject specific vocabulary which can be transferred into practice in the workplace.
- We aim to support students to apply key knowledge to a range of case studies so students can remain committed to reflecting on important decisions regarding health and social care.
- We are committed to develop knowledge in ways to overcome barriers experienced by people in health care and social care.

Pride

- We are proud of how students show enthusiasm for making connections between theory and real-world case studies.
- Students show pride in reflecting on their knowledge and making critical decisions to support individuals in their need to continue to grow and achieve.
- We are proud of our students for remaining dedicated to aiming to achieve the best in their studies.
- Students show pride in their knowledge of essential skills and attributes for any future roles they take on.
